

PROGRESS UPDATE

Where things stand, in short.

A quick note on what's live, the new address, and the one piece still being switched on.

1. The website, booking, and admin dashboard are all live

Patients can see today's fee and whether you're in, ask Ramu a quick question in English or Telugu, and book their own slot without calling the clinic. Every booking shows up instantly in the admin dashboard, which is what the front desk now runs the day from: today's queue, the weekly schedule, patient history, and revenue.

Live

2. New address: rcorthocare.made-by-ac.com

The site has moved off the temporary testing link and onto its own domain. Same site, same everything, just the clinic's own name in the address bar now.

Live

3. Automatic WhatsApp confirmations

Confirmation and cancellation texts still go out by hand today, the front desk sends them right after each booking, which takes about a minute and nothing gets missed. To make that automatic, the clinic's WhatsApp number needs Meta's business verification. That's been submitted and is under review on Meta's side now. Once it clears, sending switches on by itself, with nothing changing for staff or for patients.

Under review with Meta

NOTHING NEEDED FROM YOU

This is just an update, not a request. Call anytime if you'd like to go through any of it together.
